

X12 Version 5010 HIPAA Transaction Standards

What's Changing for BlueChoice HealthPlan Medicaid 834 EDI Trading Partners

BlueChoice HealthPlan Medicaid appreciates your collaboration as we migrate to the X12 Version 5010 HIPAA Transaction Standards. The following overview was created to help highlight changes for the 834 transactions associated with our 5010 implementation. Carefully review this information (in conjunction with the 834 User Guide and Companion Document) for any needed software revisions and share as appropriate.

To ensure that you receive all the necessary 5010 communications, please join our [5010 distribution list](#).

834 ENROLLMENT FORMAT

Effective 1/1/2012, only 5010 Errata 834 transactions will be accepted* and validated through HIPAA 1-7 edits. Implementation Coordinators will be contacting you directly. (*applicable to current X12 v3070, 401095, 401095A1 users)

TECHNICAL REPORT TYPE 3 (TR3)

Trading Partners must access the 834 TR3 from wpc-edi.com for the details related to the 5010 highlights:

- Semantic notes clarify code usage
- Change updates versus full file replacements/audits
- NEW QTY segment, transaction set control totals, subtotals (by employee, dependents, and total)
- NEW maintenance reason codes, member policy amount qualifiers
- Reporting category loops
- Designation of confidentiality and privacy options

TELECOM SETUPS

The following connectivity options support upload/download of transactions, acknowledgements and reports. Note – dial-up methods will not be available for 5010.

- Secure FTP
- Secure FTP w/PGP authentication
- FTP w/PGP encryption

Internet options include HTTPS GUI Web access.

The following compressions are supported:

- PKZIP/GZIP – DOS, Windows and UNIX based platforms
- UNIX Compress – UNIX based platforms
- UNIX Pack – UNIX based platforms

TRADING PARTNER RESPONSE REPORTS

Upon migration, acknowledgments will be delivered to trading partners based on acceptance/rejection of an inbound 834. **Format: Note changes for 864.**

- 5010 X12 TA1 – for ISA and/or IEA errors
IA[BE]{Gateway filename}{3 digit seq}.834
- 5010 864 (TA1) –for duplicate GS Control # (GS06), invalid version, and envelope control segment errors
TA1{MMDDhhmmssnn}.864.zip
- 5010 999 replaces the 4010 997
FA{10 byte BE filename}{3 byte # of GS}{6 byte seq #}.999
- 5010 864 (Level 2 Status Report)
TX{10 byte BE filename}{3 byte # of GS}{6 byte seq #}.834

ENTERPRISE EDI GATEWAY (EEG) ALERT MESSAGES

Broadcast messages are delivered to the EEG and recognized with an 'RP' prefix.

Format: RP{RunID}

- system modifications with effective dates
- important electronic issues and helpful EDI hints
- holiday processing and seminar schedules
- general information – transactions and reports

It is imperative that you review Alert Messages. These messages may contain information that requires action on your part, such as changes in programming or billing practices. We strongly recommend that clearinghouses evaluate each Alert Message, then forward it to the provider as appropriate.
