What does this mean for you?

Some medications you take may no longer be preferred. You'll need approval from us to continue to get these medications.

What should I do if I use a nonpreferred drug?

Talk with your doctor to see if you can change to the new preferred drug. If your doctor says you can take the new preferred drug, ask him or her to write a new prescription for you. You and your doctor have the final say in your care.

Things to remember:

- This doesn't change which pharmacy you go to or where you get your care.
